

HOW CAN I USE MY WATER SLIDES ALL YEAR ROUND?

SplashWare Galaxy – The SplashWare Galaxy is a capsule that makes sliding possible while fully dressed in cold weather. This is a unique product that is compatible with any conventional water slide and it's mobile so it can be installed in or removed from water slides without modifications on the water slide itself.

HOW CAN SPLASHWARE INCREASE MY PROFIT?

Advertising – Display advertisements or information about your services on the Start-Stop System or Scoreboard to earn back the price of these systems faster and increase your income.

Sell photos – You can use the Photo System to spread the word about your park, but you can also sell the images via the SplaShare cloud-based service and Photo Terminals.

Attract more visitors – New features on your slide can increase customer satisfaction and attract more guests to your establishment. SplashWare can be installed in existing slides so you don't need to rebuild your water park to show something new.

HOW DOES SPLASHWARE REDUCE MY EXPENSES?

Safety operation – Reduce injuries and compensation costs. Thanks to the Start-Stop System your guests can see **when it's safe to slide** and the Photo System can help you to learn more about cases when the slide wasn't properly used.

Optimisation – Use the data from the SplashWare System to **learn more about the usage of your slides**, analyse your costs and improve work efficiency.

HOW CAN SPLASHWARE ATTRACT MORE VISITORS TO MY PARK?

Sharing photos – Share the images made by the Photo System with your guests for free so everyone can share their experiences about your establishment on social media and **utilise Word-of-Mouth marketing**.

New features – Your water slides can give a **greater experience** to your guests with SplashWare. Launch sliding competitions with the **Scoreboard** or renew your slides with **animated light effects** and the interactive **SplashTouch** game to increase customer satisfaction.
